

SmarTone extends 5G service to 7 major MTR lines

(Hong Kong, 7 September 2020) – As the leading mobile operator in Hong Kong, SmarTone launched its world-class 5G network with the widest coverage through Ericsson’s industry-leading Dynamic Spectrum Sharing technology. SmarTone is offering optimized user experience to its customers by efficient use of the existing spectrum and seamless integration between 4G and 5G.

SmarTone today announces that it has extended its 5G coverage to 20 MTR stations across 7 major lines citywide to provide consumers with the faster, stabler and smoother 5G experience. SmarTone will continue to work closely with MTR to extend its 5G coverage to more stations across Hong Kong.
