

**SmarTone Solutions and TP-Link  
Announce Global Debut of “All-in-One Network Solution”  
Delivering Seamless Smart Home Experience**

(Hong Kong, 19 December 2022) SmarTone Solutions, the enterprise solution business of SmarTone, and TP-Link, a global wireless network equipment brand, jointly announce the global debut of the “All-in-One Network Solution” today. Developed by TP-Link, this Wi-Fi solution ensures a seamless Wi-Fi network coverage and enhances network experience for residents and small and medium enterprises.

The "All-in-One Network Solution" consists of a "3-in-1 Network Controller", which integrates a router, a switch, and a network controller, and supports Wi-Fi 6E and the ability upcoming Wi-Fi 7 technologies. With a single interface, users can control multiple network devices. Its compact size and simple design makes installation more flexible, allowing it to fit into different indoor layouts.

SmarTone Solutions will install the "3-in-1 Network Controller" and in-wall wireless access points (APs) for the new smart residential projects, as well as pre-set Wi-Fi network and Smart Home smart living services. Through the cloud management application and web interface, residents can manage the whole home network and smart home devices anytime, anywhere with their mobile devices, providing a more convenient smart home experience.

Daniel Leung, Head of Business Markets of SmarTone, said, “ SmarTone Solutions is committed to improving the smart home experience of residents. During the preparation of residential projects, we planned the installation of wireless networks in the units so that residents could start enjoying the service immediately after

moving in. Currently, more than 15,000 units in many large housing estates have adopted SmarTone Solutions' smart home Wi-Fi network solution. We are pleased to launch the 'All-in-One Network Solution' with TP-Link and believe it will make smart homes easier to achieve.”

Alvin Ou, Regional Director of Hong Kong and Macau of TP-Link, said, “As the world’s No.1 brand of Wi-Fi devices, TP-Link is committed to technological innovation. In the past four years, TP-Link and SmarTone Solutions have successively launched a number of home wireless network products, which have been applied to different residential projects and small and medium-sized enterprise offices, giving users a new smart whole-home Wi-Fi living experience, and securing good reputation and recognition in the market. Our mutual trust has led us to launch the new 'All-in-One Network Solution', which integrates high-quality technology products and professional projects to provide users with a faster and more stable network experience. The solution will further enhance user experience in line with smart home trends.”

SmarTone Solutions x TP-Link “All-in-One Network Solution” will be first launched by SmarTone Solutions from today. To subscribe, please visit: <https://www.smartonesolutions.com.hk/en/contactus/?kind=41>

## Product Specification

- **3-in-1 Network Controller**

- Integrates security VPN router, PoE switch, and Omada controller
- Centrally manage different types of in-room and outdoor Wi-Fi APs, including Wi-Fi 7/ 6E/ 6 AP
- Cloud log-in technology allows you to remotely control the whole network anywhere, anytime with cloud access
- Up to four WAN Gigabit Ports (2\*SFP WAN/ LAN, 1\*RJ45 WAN and 1\*RJ45 WAN/LAN)
- 8\* PoE+ LAN ports with a total power supply of 110W to directly power the AP/ IP Camera
- Highly secure VPN: support IPsec VPN, OpenVPN and L2TP/PPTP VPN connection

- **AX3000 Wall Plate Compact Wi-Fi 6+ AP <EAP650-Wall>**

- 86mm x 86mm ultra-slim, space-saving design can perfectly blend into any home setting
- Dual-band Wi-Fi 6+ 160MHz bandwidth that doubles the connection speed

- Separate Wi-Fi On/Off button and LAN Port
- PoE powered and no additional power supply required

- **AX11000 Quad-Band Wi-Fi 6E Ceiling Mount AP <EAP690E HD>**
  - 6 GHz Band ensures minimal congestion on a new frequency, delivering blazing-fast connection
  - Simultaneous quad band Wi-Fi (6GHz + 5GHz-1 + 5GHz-2 + 2.4GHz)
  - Simultaneously connects up to 2,000 users, suitable for high-density scenarios like shopping malls, schools and offices
  - Extends Wi-Fi coverage more flexibly and ensures optimized seamless roaming network experience with Omada Mesh technology
  - Boosts overall throughput with 10Gbps LAN wired connection and 4800Mbps 6GHz Wi-Fi speed
