

## **SmarTone Supports HKWALLS Hong Kong Street Art Festival**

### **Powering Hong Kong's Art Event with Leading 5G Connectivity**

**(Hong Kong, 20 March 2026)** SmarTone announced that it has become the Official Network Partner of HKWALLS 2026 – Hong Kong Street Art Festival. Leveraging its territory-wide leading 5G network, SmarTone will provide high-speed and reliable connectivity for this annual street art event, using technology to connect communities and street art while promoting cultural inclusion.

Street art takes the city as its canvas, with the creative process often spanning multiple locations. With SmarTone's extensive 5G coverage across Hong Kong, artists from around the world can stay connected while creating artworks across the streets and alleys of Hong Kong. They can upload high-definition creative footage, and interact with the public on social media platforms to instantly share their creative inspiration. Even at crowded street festival venues, the public can enjoy SmarTone's seamless connectivity to share memorable moments.

SmarTone's enterprise solutions arm, SmarTone Solutions, also supports a wide range of large-scale live events, from outdoor carnivals to major concerts, by delivering comprehensive network solutions. With carrier-grade connectivity designed specifically for high-traffic environments, SmarTone helps event organisers ensure the stable and reliable performance of critical applications — including electronic payments, live streaming and real-time interactions — even during peak periods, enabling smooth event operations and an enhanced audience experience.

SmarTone is committed to connecting communities through technology. By supporting the Hong Kong Street Art Festival, SmarTone hopes to encourage the public to engage with the community through cultural initiatives with social impact, bring people closer together, and document the evolution of neighbourhoods through their mobile devices.

HKWALLS 2026 will take place from 21 to 29 March 2026. International and local artists will create murals across Central and Western District, alongside a series of activities at PMQ in Central. During the festival, the public can witness mural creations at various locations, participate in workshops, and join guided art tours across the district.
